

Press Release, Family Council of Victoria – 28th April 2019

The Federal Election May 18th 2019

Family Council slams Labor/Green Policy

Left-leaning government policies at State and Federal level have trashed morality and freedoms in ways that would have shocked and appalled the men and women who defended and built this nation.

Policies announced by Left-wing parties seeking government would force hospitals, doctors and nurses to violate conscientious beliefs and terminate babies even hours before a normal healthy birth.

The Left’s promotion of radical gender ideology has caused massive increases in cases of gender confusion in primary and secondary schools. It allows boys to enter girls’ toilets and change rooms, violating their privacy and safety and increasing the incidents of voyeurism. It leads to dangerous chemical and surgical mutilation of minors in attempting the impossible - to change sex - despite evidence that it is neither advisable nor safe in the long-term.

The ‘Safe Schools’ program favoured by the Left is tantamount to grooming children for sexual abuse and leaving them vulnerable to trolling paedophiles. Their radical “progressive” policies will produce confused and demoralised children who will have trouble establishing stable families free of abuse and violence.

If the Left wins in May, freedom of speech and religion will be further restricted and the Ruddock Review into Religious Freedom recommendations will never see the light of day.

The Family Council of Victoria urges voters to reject the Left’s cultural Marxist philosophies by electing candidates who will overturn ‘progressive’ policies which trash community standards to the detriment of traditional family values, personal freedoms, and the nation’s future.
